ABSTRACT

PRINTER TRANSFER ROLLER WITH INTERNAL DRIVE MOTOR

A print engine for a printer includes a page width printhead. A transfer roller is arranged adjacent the printhead for transferring ink deposited on its surface by the printhead to a surface of a sheet of print media on which an image is to be printed. The roller has a passage defined through it. A drive motor for rotatably driving the transfer roller and feeding the print media passed the transfer roller is arranged in the passage of the transfer roller.
