(54) Title: PLANT SUPPORT STRUCTURE AND SYSTEM

(57) Abstract: A plant support structure for accommodating plants is described. The plant support structure includes a framework in a vertically extending arrangement forming a plurality of geometric blocks and vertically extending channels formed at a periphery of the geometric blocks. The channels are configured to receive therein a porous material for carrying water from a top end of the plant support structure down the channels for irrigating plants in the channels. A system for accommodating and maintaining plants includes the plant support structure.
