

APPARATUS, AND ASSOCIATED METHOD, FOR FACILITATING I-WLAN PLMN SELECTION

ABSTRACT

Apparatus, and an associated method, for selecting an EHPLMN pursuant to I-WLAN PLMN selection. An EHPLMN listing is created and maintained at user equipment. Available I-WLAN PLMNs are collected and buffered. A comparator compares entries on the EHPLMN listing and the collected identities. And, I-WLAN PLMN selection is made responsive to the comparison.
