

ABSTRACT OF THE DISCLOSURE

**ALERT OUTPUT TIMING CONTROL APPARATUS, ALERT OUTPUT
TIMING CONTROL METHOD, AND NON-TRANSITORY COMPUTER
READABLE STORAGE MEDIUM**

5

An alert output timing control apparatus is configured to hold an analysis target image and time information indicating a period of time to be spent until alert is output, and output the analysis target image to a display apparatus. When the analysis target image is input to a model and
10 it is determined that an alert target object is included in a photographic object of the analysis target image, the alert output timing control apparatus obtains a period of time from the time information and performs control so that alert is output at timing that arrives when the obtained period of time elapses since given timing after the analysis target image is
15 output.
