(54) Title: DYNAMIC GENERATION OF CSI FOR INBOUND ROAMERS

(57) Abstract: The present invention provides a system and method for generating a Mobile Originating Customized Applications for Mobile network Enhanced Logic (CAMEL) Subscriber Information (MO-CSI) of an inbound roamer. The system includes a roamers database to store at least one inbound roamer record. The inbound roamer record comprises at least the International Mobile Subscriber Identity (IMSI) of the inbound roamer. Further, the system includes a detection block to detect whether generation of the MO-CSI is required for the inbound roamer and a MO-CSI generation block to generate the MO-CSI of the inbound roamer based on at least a CAMEL phase supported by a Home Public Mobile Network (HPMN), if the generation of the MO-CSI is required. The system also includes a provisioning block to provision at least the generated MO-CSI at a Visited Public Mobile Network (VPMN) Visited Location Register (VLR).
