THERMOSTAT BODY SLIM CABIN

ABSTRACT

A thermostat body slim cabin comprised of bed(1),
5 rear canopy(22), front canopy(21), lamp(3), air
circulation(4), control circuit(5), exercise device(6) and
AV system(7); rails(18) are provided on the bed(1) for
sliding both canopies(21,22) back and forth; the control
circuit(5) operates in conjunction with the lamps(3) and
10 the air circulation(4) to maintain constant the
temperature inside the cabin while the exercise device(6)
and AV system(7) allow the user exercise his hands, feet
and trunk following the pre-taped program displayed by the
AV system(7), or the user may simply enjoy the AV program
15 while resting inside the cabin.
