

ABSTRACT OF THE DISCLOSURE (FIG. 1)

"METHOD AND APPARATUS FOR OPTIMIZING AUTO
GAIN CONTROL OF READ CHANNEL IN A DISK DRIVE"

5

There is disclosed a disk drive which can
appropriately execute a gain control of an AGC
amplifier included in a read channel for each zone on
a disk. A CPU refers to table information stored in
10 a memory, and reads initial gain data corresponding to
the zone during switching of the zone as a read object.
The CPU sets the read initial gain data into the AGC
amplifier.
