

REHABILITATION SUPPORT AND MAINTENANCE SYSTEM

ABSTRACT OF THE DISCLOSURE

5 A rehabilitation support and maintenance system includes a brace
of a rehabilitation patient, and an analysis mechanism that analyzes
information from the brace. The brace includes a number-of-steps
counter at a foot portion, and the number-of-steps counter includes a first
sensor that detects pressure, and a control circuit board that transmits ID
10 information and number-of-steps information. The analysis mechanism
includes a data collecting terminal that receives and temporarily stores
the number-of-steps information, a server which is connected via a
network and which analyzes the number-of-steps information, and a
display terminal that displays the analysis result.
