ABSTRACT

There is provided a massage device for performing a grabbing massage such as to grab a to-be-massaged area.

The massage device (1) comprises: a kneading massage member (2) having a kneading massager (9) at its front end; and a grabbing massage member (8) having a grabbing massager (7) at its front end, which is disposed on the base end side of the kneading massage member (2), and, the grabbing massage member (8) is designed to perform a grabbing massage by moving the grabbing massager (7) of the grabbing massage member (8) close to and away from the kneading massager (9).
