(54) Title: METHOD AND SYSTEM FOR TRANSMITTING MONITORING DATA, AND PERIPHERY DEVICE

FIG. 2

(57) Abstract: Disclosed are a method and system for transmitting monitoring data, and a periphery device. 5 By the method, a plurality of first files are acquired by segmenting monitoring data acquired from at least one monitoring device, and the plurality of first files are transmitted to a cloud. Since the cloud acquires the monitoring data in the form of the first files, it is convenient to analyze and manage the monitoring data in different first files, and the flexibility is improved. In addition, as the file formats of the plurality of first files transmitted by the periphery device to the cloud are 10 the same, a parsing engine capable of parsing the first files only needs to be installed on the cloud. In this way, the efficiency of file parsing is improved and the complexity is lowered, and the memory occupied by the parsing engine may be reduced.
