(54) Title: SOIL BASED MATERIAL AND METHOD OF PRODUCING SAME

(57) Abstract: This invention relates to a soil based material for improving the qualities of the soil. The invention is particularly concerned with improving load bearing qualities and impact loading qualities of the soil. The soil based material includes synthetic fibres (5) scattered throughout the soil matrix (4) and may include additives such as resilient particle (20) also scattered throughout the soil matrix (4). The invention also relates to a method and apparatus for producing the soil based material.
