

**AVATAR DISPLAY DEVICE, AVATAR GENERATION DEVICE,
AND PROGRAM**

Abstract

5 An avatar display device (20) includes: an obtaining part
(210) that obtains captured image data of a person; a second
obtaining part (211) that obtains, from the captured image
data, depth data or image data of the person; a generating part
(212) that composes a 3D model in accordance with the depth
10 data or image data to generate an avatar; and a display part
(213) that displays, in an image display area (31) of an
information communication device (30), the avatar that is
caused to follow a motion of the person.
