

NOVEL CRYSTAL OF 3-[5-[4-(CYCLOPENTYLOXY)-2-HYDROXYBENZOYL]-2-[(3-HYDROXY-1,2-BENZISOXAZOL-6-YL)METHOXY]-PHENYL]PROPIONIC ACID

ABSTRACT

Disclosed is a crystal of 3-[5-[4-(cyclopentyloxy)-2-hydroxybenzoyl]-2-[(3-hydroxy-1,2-benzisoxazol-6-yl)methoxy]phenyl]propionic acid having refraction angles of 14.0, 16.0, 23.3, 23.7 and 26.3°; as measured in terms of 2θ ; in powder X-ray diffraction pattern. Also disclosed is a crystal of 3-[5-[4-(cyclopentyloxy)-2-hydroxybenzoyl]-2-[(3-hydroxy-1,2-benzisoxazol-6-yl)methoxy]phenyl]propionic acid having refraction angles of 14.6, 23.1, 24.7, 25.6 and 26.0°; as measured in terms of 2θ ; in powder X-ray diffraction pattern. These crystals have small specific volumes, are hardly charged electrically, can be handled easily, and are useful as excellent active ingredients for anti-rheumatic drugs.
