
S1021
A magnitude relationship between the predicted ambient temperature T1 and the current ambient temperature T2 is determined
T1≥T2
T1<T2
S1022
The predicted ambient temperature T1 is determined as the minimum ambient temperature T_min
S1023
The current ambient temperature T2 is determined as the minimum ambient temperature T_min

FIG. 3

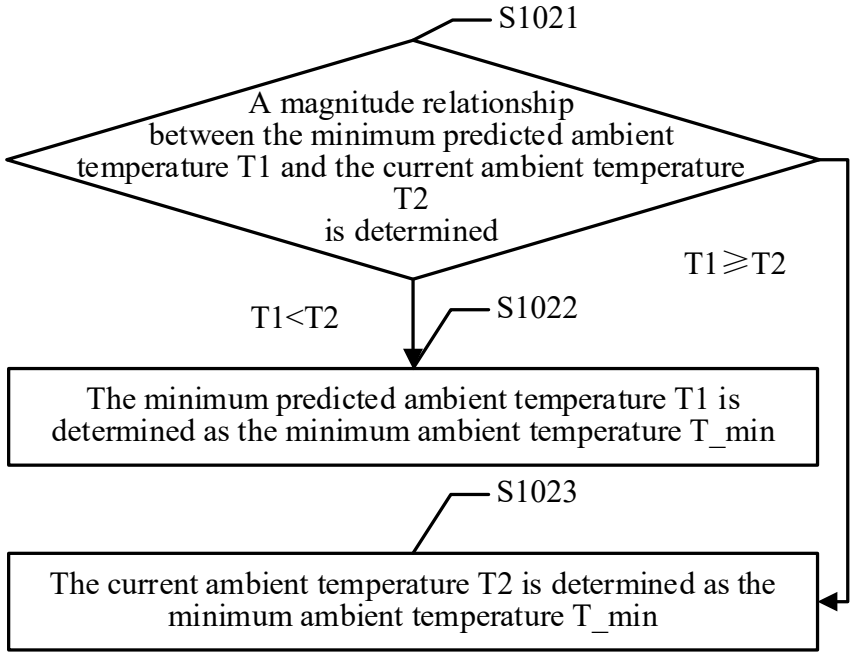

S1021
A magnitude relationship between the minimum predicted ambient temperature T1 and the current ambient temperature T2 is determined
T1≥T2
T1<T2
S1022
The minimum predicted ambient temperature T1 is determined as the minimum ambient temperature T_min
S1023
The current ambient temperature T2 is determined as the minimum ambient temperature T_min
