

Abstract

The present application relates to a salt of an aromatic ring-containing derivative antagonist, a crystal form thereof, a preparation method therefor, and an application thereof. Specifically, the present application relates to a compound salt of formula (I), a crystal form, a preparation method, and a pharmaceutical composition containing a therapeutically effective amount of the salt or crystal form, and the use thereof as a protease inhibitor in the preparation of a medicament for treating or preventing a disease with dual angiotensin-dependent and endothelin-dependent mechanisms.
