

Diagram illustrating a top view of a circular substrate 600. The substrate contains a grid of square elements 110, which are arranged in a pattern that is roughly circular but has a stepped, pixelated appearance. The grid is composed of many small squares, with some squares missing or highlighted in a different pattern to form a larger, irregular shape. The label 600 points to the outer boundary of the substrate, and the label 110 points to one of the square elements within the grid.
