(54) Title: AN INSTALLATION UNIT IN A HEATING OR COOLING SYSTEM

(57) Abstract: A device for a coordination of installation components in a heating or cooling system, which device comprises a number of distributors (3), provided with functional components (5), the distributors being mounted in a profile (4), which in its turn is fixed in the complete installation unit (1), the profile (4) providing the distributors with a rotational mounting position together with a possibility in a later installation or service situation to supplement the installation unit with several additional distributors.
