(54) Title: SYSTEMS, METHODS AND COMPUTER PROGRAM PRODUCTS FOR DISPLAYING DATA

Fig. 1

(57) Abstract: A method comprising displaying a financial record on a user interface is disclosed. The method comprises displaying, in a input field of the financial record, a first input value and displaying, in an output field of the financial record, a first output value. In response to determining an occurrence of a focus-off event associated with the input field, the method comprises: obfuscating the first output value; determining a second input value associated with the input field; providing the second input value to a calculation application; receiving, from the calculation application, a second output value, wherein the second output value is determined, by the calculation application, based on the second input value; and in response to receiving the second output value, displaying the second output value in the output field.
