FABRIC STRUCTURE

ABSTRACT OF THE DISCLOSURE

A fabric structure includes an upper stretch-yarn layer having a plurality of upper layer stretch yarns; a lower stretch-yarn layer having a plurality of lower layer stretch yarns; and a middle non-stretch-yarn layer having a plurality of non-stretch yarns and being integrally connected to and located between the upper and the lower stretch-yarn layer. With the middle layer integrally connected to the upper and the lower layer through weaving, the fabric structure has thick and solid touch, and good stretch, air permeability, and fabric comfort, and is free of curled edges.
