

OIL AND FAT COMPOSITION FOR ROUX

[ABSTRACT]

The present invention addresses the problem of providing a processed food that
5 is produced from a roux using a plant oil and fat in a raw material for an oil and fat
composition for roux, and that has a flavor similar to when pork fat or beef fat is used in
a raw material for an oil and fat composition for roux. A solution to the problem is an oil
and fat composition that is for roux and that uses shea fat as a raw material.
