

ABSTRACT

SAPONIFIED ETHYLENE-VINYL ESTER-BASED COPOLYMER PELLET AND METHOD FOR PRODUCING SAME

Provided is an EVOH resin pellet which is capable of reducing the occurrence of fish eyes in a melt molded article of an EVOH resin. The occurrence of fish eyes in a melt molded article such as a film that is produced by melt molding using pellets is able to be suppressed by setting the abundance of a conjugated polyene in a surface portion of the pellet to an intended amount or more.
