(54) Title: ASSISTED MEDICAL AND ASSOCIATED LIFESTYLE DECISION MAKING

(57) Abstract: Methods, systems, devices, and computer-readable media for generating a location-based physiological history of a subject are provided. Methods may include generating, with the aid of a processor, a location-based physiological history of the subject by correlating geolocation data of the subject with physiological data and exogenous data. The geolocation data may be obtained with the aid of a geolocation system on or associated with the subject. The exogenous data may be of or related to environmental conditions at a geographic location of the subject.
