

ABSTRACT

INJECTION HEAD HAVING SILENCING FUNCTION FOR GAS-TYPE FIRE EXTINGUISHER AND METHOD FOR STORING AND ASSEMBLING THEREOF

By making it to provide an injection head having silencing function for gas-type fire extinguisher and method for storing and assembling thereof capable of eliminating the problems of limitations of place of storage and the cost increase, by making it easy to storage the injection head as stock, the injection head 1 is comprising an injection head main body 2 forming a connecting part 21 for connecting a pipe, an orifice plate 31, 32 forming orifice 31a, 32a disposed in the injection head main body 2 for passing the fire extinguishing gas, and a silencing member 4 of block shapes formed on porous material capable of passing the fire extinguishing gas disposed at the outlet side of the orifice plate 32 for releasing the fire extinguishing gas, wherein the orifice plate 31 is disposed detachably in the injection head main body 2 through an opening 22 in the side of a connecting part 21 connected to a piping of the injection head main body 2.
