

ABSTRACT

INSECT REPELLING GARMENT

5

There is provided a garment capable of at least repelling insects from its wearer. The garment can be fashioned in a manner so as to be capable of being worn by a wearer. The garment can include a body portion. The body portion can include at least one net with insecticidal property. The body portion can further include at least one coupling portion which can be fashioned in a manner so as to be capable of removably coupling at least one auxiliary netting with insecticidal property to the body portion. Preferably, the auxiliary netting(s) can be coupled to the body portion in an exposed manner.
