

ABSTRACT

A method and device for storing lyric phonetic notations, relates to the technical field of computers. The method includes: a server can receive a phonetic notation storage request for a target lyric (101), and then obtain pronunciations of polyphonic characters in the target lyric and determine a playback duration of each furigana in the pronunciations of the polyphonic characters (102), obtain display information of the pronunciations of the polyphonic characters, the display information being used for indicating the playback time of the pronunciations of the polyphonic characters, finally correspondingly store the pronunciations and the display information of the polyphonic characters with the target lyric (104). The method can improve the efficiency of displaying lyric phonetic notations.
