

ABSTRACT

The present disclosure relates to a video interaction method and apparatus, and a device and a medium. The video interaction method comprises: presenting a video list in a video presentation page; when a first operation on the video list is detected, playing, on the video presentation page and by means of a floating window, a video corresponding to the first operation; and when a second operation on the floating window is detected, jumping, from the video presentation page, to display a target video detail page, wherein the target video detail page is a video detail page corresponding to the target video, which is played in the floating window. According to the embodiments of the present disclosure, the efficiency of a user searching for a video of interest can be improved.
