(54) **Title:** CONSTRUCTION METHOD AND SYSTEM

Figure 1

(57) **Abstract:** A construction method which comprises mounting a cable raising device 26 to a structural column 12, supporting a construction platform 16 from the cable raising device 26 via a cable 32, and elevating the construction platform 16 via raising the cable 32 with the cable raising device 26. The construction platform 16 is then supported by a platform supporting means which is different to the cable raising device 26. The cable raising device 26 can then be dismounted, and a new column 12 installed on top of the previous column 12, with the cable raising device 26 mounted to the new column 12.
