(54) Title: HUMAN GROWTH HORMONE CRYSTALS AND METHODS FOR PREPARING THEM

(57) Abstract: The present invention relates to stable, extended release crystals of human growth hormone or a human growth hormone derivative and compositions or formulations comprising such crystals. The invention further provides methods for producing those crystals and compositions. The invention further provides methods for treatment of an individual having disorders associated with human growth hormone deficiency or which are ameliorated by treatment with human growth hormone using those crystals and compositions or formulations.
