(54) **Title:** METHOD AND SYSTEM FOR STORING DATA IN A CLOUD NETWORK

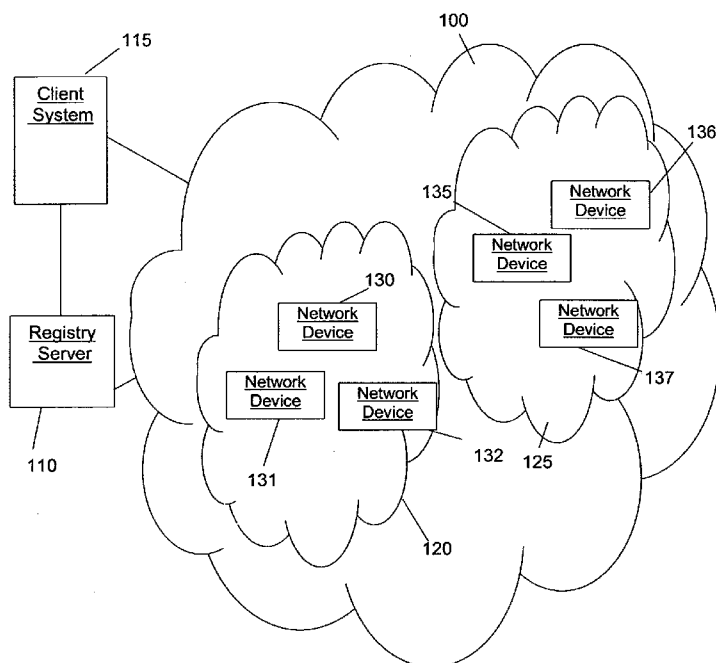

Figure 1

(57) **Abstract:** This invention relates to a system for storing data on a plurality of device in a cloud network. The system comprises a server, a processing unit and a media readable by the processing unit. Instructions for directing the processing unit are stored in the media. The instructions comprises receiving data storage information for a plurality of slices of data representing a set of data wherein the data storage information includes an identifier of each of the plurality of slices, an identifier of one of said plurality of devices in said cloud network storing the data, and error detection data for each of the slices, and storing the data storage information in a memory.
