(54) Title: AN IMAGING APPARATUS

(57) Abstract: An apparatus for imaging, the apparatus including a detector (728) having a field of vision, at least one first reflector (730A) positioned in the field of vision for dividing the field of vision into first and second fields of vision, and at least one second reflector (730B) positioned in a respective one of the first and second fields of vision for further dividing the respective field of vision such that the first and second reflectors reflect radiation (734) from distinct imaging regions to the detector (728), the detector being responsive to the radiation (734) to image the distinct imaging regions.
