

ABSTRACT

A hot-melt adhesive composition comprises 100 parts by weight of a tackifier (B), and 1 to 900 parts by weight of an α -olefin/aromatic vinyl compound random copolymer (C).

- 5 A hot-melt adhesive composition comprises 100 parts by weight of a base polymer (A), 1 to 900 parts by weight of component (B), and 1 to 1,000 parts by weight of component (C). A hot-melt adhesive composition comprises 100 parts by weight of component (A), 10 to 300 parts by weight of component (B), and 10 to 400 parts by weight of component (C). The component (A) is preferably at least one polymer selected from the group consisting of a polyolefin (a-1), a polar group containing polymer (a-2) and an aromatic vinyl compound/conjugated diene copolymer (a-3).
- 10
- 15 These hot-melt adhesive compositions exhibit excellent adhesive strength and can be used as an adhesive for styrene resins.
