ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: SLIDE AND CLIP-IN CORNER SUPPORT

(57) Abstract: The invention provides a reinforcing corner post (16) suitable for use with a container comprising a foldable blank (15) having a base panel (10) and a pair of opposed side wall panels (11), and a pair of opposed end wall panels (12), the side wall panels and end wall panels being foldable into upright positions relative to the base panel to define opposed side walls and end walls with corners being formed at the junctions of the side walls and end walls, the reinforcing corner post being provided at all or selected corners of the container, wherein the corner post comprises an external post section (17) which embraces the corner, and an internal post section (18) which nests within the corner, and engaging means (19) for releasably coupling the external post section and internal post section to one another by longitudinal displacement of the external post section and internal post section relative to one another to an engaged position, and locking means for securing the inner post section and the outer post section in the engaged position.
