

Abstract

POLYPEPTIDE COMPOUND AND USE THEREOF

Disclosed are a polypeptide compound and the use thereof. Provided are a polypeptide compound, a pharmaceutically acceptable salt thereof, a solvate thereof, or a solvate of the pharmaceutically acceptable salt thereof, wherein the polypeptide compound is a compound as represented by formula (I); wherein A₁, A₂, A₃, A₄, A₅, A₆ and A₇ are sequentially connected via a peptide bond (-CO-NH-). The polypeptide compound of the present invention has relatively good inhibitory activity against an FAP protein.
