(54) Title: METHOD OF CONSTRUCTION

Fig. 4

(57) Abstract: A method of erecting a multi-storey structure is disclosed. During construction, at least a portion of a perimeter facade of the structure is disposed to extend at least two storeys height beyond an upper work area of the structure and forms at least part of a safety barrier for that work area and wherein in erecting the multi-storey structure, at least one further floor of the structure is erected over the upper work area. The further floor forming a respective subsequent upper work area of the structure, and wherein at least a portion of the facade is disposed to extend at least one storey height beyond the uppermost of the subsequent work areas.
