(54) Title: MOBILE COMMUNICATIONS

(57) Abstract: A mobile videophone capable of transmitting and receiving information in mobile telecommunications systems, particularly cellular radio networks. The videophone includes a first portion and a second portion, the second portion being rotatable with respect to the first portion, the second portion including a camera for image capture, the camera including a lens, the second portion being rotatable with respect to the first portion from a first position, in which the camera lens is protected by said first portion, to a second position in which the first portion does not protect the camera lens.
