

ABSTRACT

Embodiments of the present disclosure provide map display method, apparatus, a storage medium, and an electronic apparatus. The method includes determining a touch coordinate of a touch point of a touch action on a target map in a case that the touch action on the target map displayed on a touch display screen is detected; determining a rectangular area centered on the touch coordinate according to the touch coordinate, a first preset length, and a second preset length; and displaying an image included in the rectangular area in a target display area on the display screen. According to the present disclosure, a problem of low accuracy of map editing of a cleaning device in related technologies is resolved, thereby achieving the effect of improving accuracy of map editing of the cleaning device.
