(54) Title: CARTRIDGE AND PRINTING MATERIAL SUPPLY SYSTEM

Fig.7

(57) Abstract: A cartridge (20) comprises an ink supply structure (280), a terminal bearing structure (408), and a first restriction portion (210). The terminal bearing structure (408) has terminals (400) arranged in a terminal plane which is neither parallel nor perpendicular to a plane defined by a mounting direction leading edge of the ink supply structure (280), so that the contact portions of the terminals (400) receive a force in a direction opposite (RD) from the mounting direction. An engagement portion of the first restriction portion (210) is provided at a position adjacent to the terminal bearing structure (408).
