

Abstract

The present disclosure provides a precious metal article having a plating layer on the surface and a preparation method thereof. The precious metal article comprises: a precious metal base, and a physical vapor deposition layer or a galvanic plating layer or an electrophoretic layer and a transparent film layer which are sequentially attached on the precious metal base, the precious metal is gold or silver. The film layer formed on the surface of the precious metal article is relatively thin and can exhibit different colors, improve a single color of the precious metal base, the color change does not influence purity of the precious metal base; and the transparent film layer can make the formed film layer to have an enhanced stability and a strong abrasion resistance, and the formed color is durable with colorfastness.
