

CLAIMS

1. A food wrapping film comprising:
 - a thermoplastic resin;
 - a blue colorant; and
 - a polyglycerol fatty acid ester,wherein a content of the polyglycerol fatty acid ester is 1.0% by mass or more and 2.5% by mass or less based on a total amount of the film,
 - the thermoplastic resin is at least one selected from the group consisting of polyvinyl chloride resins, polyvinylidene chloride resins and polyolefin resins, and
 - the blue colorant is at least one selected from the group consisting of copper phthalocyanine, iron(III) hexacyanoferrate(II), cobalt oxide-aluminum oxide mixture, indigo and ultramarine.
2. The food wrapping film according to claim 1, comprising, as the thermoplastic resin, 70% by mass or more based on the total amount of the film of at least one resin selected from the group consisting of polyvinyl chloride resins, polyvinylidene chloride resins and polyolefin resins.
3. An article comprising:
 - the food wrapping film according to claim 1 or 2;
 - a core material on which the food wrapping film is rolled; and
 - a box in which the food wrapping film and the core material are stored,wherein the box is provided with a blade part for cutting the food wrapping film.
