

STACKING CASE STRUCTURE

ABSTRACT

5 A stacking case structure includes a lower case having a box shape, an
upper case to be mounted on the lower case, the upper case having a box shape,
a movement restriction body configured to restrict horizontal movement of the
upper case relative to the lower case, and an engagement body provided in the
lower case. The engagement body includes a fixing portion fixed to an upper
10 portion of a side surface of the lower case, and an engagement portion extending
outwardly from the fixing portion so as to be spaced from the side surface of the
lower case. the movement restriction body is fixed to a lower portion of a side
surface of the upper case and has a recess recessed in a direction from a lower
portion toward an upper portion of the side surface of the upper case. The
15 engagement portion is insertable into the recess.
