

Abstract

Cleaning System for a Facade of a Building

5 The cleaning system for a facade of a building comprises
an annular supporting structure (5) which is designed
such that it can enclose the building (1). The cleaning
system also comprises a transport device (8) which is
attached to the supporting structure (5) and is provided
10 to move the supporting structure (5). In addition, a
cleaning device (6) is present, which is connected to the
supporting structure (5) and is provided to clean the
facade (1.1) of the building (1).
