

1/23

P	Location	Location of an Earth station, At latitude ϕ , which may be either a GEO or LEO Earth station or both
A	Ascending LEO	Location of the ascending LEO satellite
D	Descending LEO	Location of the descending LEO satellite
C	Center of Earth	Location of the center of the Earth for purposes of geometric calculation
Tp	Tangent at P	The tangent to the surface at location P
β	GEO Protection Angle	Angle either side of line from P to GEO, sweeping out a region inside of which LEO cannot communicate with P
α	Horizon Elevation Angle	Minimum angle between horizon and LEO at which LEO and P may communicate, as viewed from location P
γ	Angle to GEO	Acute angle between horizon and vector pointing to GEO at location P
λ	Angle of Trailing Beam	The angle of the trailing beam with respect to the LEO orbit radius, viewed from the LEO (in quadrant 1)
ψ	Angle of Leading Beam	The angle of the leading beam with respect to the LEO orbit radius, viewed from the LEO (in quadrant 1)
ϕ	Latitude of P	Latitude of a particular point P under consideration (equator at 0 degrees, quadrant 1)
σ	Latitude of LEO	Latitude of a particular LEO under consideration, in orbit (equator at 0 degrees, quadrant 1)
θ	LEO Spacing Angle	Angle between two LEO satellites in a single plane, where angle vertex is the Earth's center
a	Distance to LEO Ascend	Distance from point P to the Ascending LEO, labeled point A, when viewed from point P
d	Distance to LEO Descend	Distance from point P to the Descending LEO, labeled point D, when viewed from point P
g	Distance to GEO SAT	Distance from point P to a geostationary satellite at the same longitude as P, or otherwise projected into the plane of the LEO orbit
s	Distance Between LEOs	The line-of-sight distance between LEO satellites orbiting at height h spaced at angle θ
r_E	Radius of Earth	6371 km
h	Height of LEO Orbit	Orbit height above Earth of the LEO satellite constellation
r_L	Radius of LEO Orbit	Radius of LEO Orbit (referenced to center of Earth), Nominally (6371 + h) km
r_G	Radius of GEO Orbit	Radius of GEO Orbit (referenced to center of Earth), Nominally 42,157 km
