(54) Title: DUAL CONFIGURATION BOTTLE ASSEMBLY

(57) Abstract: A bottle assembly has an open ended container and a vent as-
sembly positionable at least in part on the rim of the container to permit vent-
ing of the container during use. The vent assembly generally comprises a vent
insert and a receptacle portion releasably connectable to the vent insert. The
vent insert includes an annular lip depending longitudinally within the con-
tainer upon positioning of the vent assembly on the rim of the container. The
annular lip has a transversely inner surface having one of a catch and a latch.
