(54) Title: PACK FOR THE NOSE**(57) Abstract**

A sheet-like pack (1A) for the nose, being applicable to the skin of the nose, comprises a holding member (20) and a cosmetic material (30), and a receding portion (6) is formed at the middle of an upper edge (2) of the pack and a projecting portion (5) is formed at the middle of a lower edge (3) of the pack. These receding portion (6) and projecting portion (5) have shapes which are fittable with each other. This provides a pack for the nose which can readily fit with the nose of various shapes, inclusive of the tip of the nose, and can contribute to an improvement in yield when manufactured in a conveyor system.
