TECHNIQUE FOR PROVIDING ELECTRONIC MESSAGES

ABSTRACT

The present disclosure relates to a method of providing electronic messages to a message receiving device. The method is performed by a messaging server. The method comprises: receiving (S210) an electronic message from a message sending device, wherein the electronic message comprises at least one attachment; generating (S230) an image of the content of the at least one attachment; embedding (S240) the image of the content of the at least one attachment in the body of the electronic message; and transmitting (S250) the message with the embedded image along with the attachment to the message receiving device.
