

ABSTRACT

POLYPEPTIDE CONJUGATE, PHARMACEUTICAL COMPOSITION CONTAINING POLYPEPTIDE CONJUGATE AND USE THEREOF

A polypeptide conjugate having the structure of formula (I): polypeptide-linker-compound, Formula (I), where the polypeptide is a peptide targeting a mesenchymal-epithelial transition factor, and the compound is a taxane compound or an enantiomer, a diastereoisomer, a solvate or a pharmaceutically acceptable salt thereof. A method for preparing the polypeptide conjugate; a pharmaceutical composition containing the polypeptide conjugate; a use of the polypeptide conjugate in the preparation of a drug for preventing or treating diseases; and a method for preventing or treating diseases using the polypeptide conjugate.
