(54) Title: METHOD OF STABILIZING PROTEINS

(57) Abstract: A method of preparing a stabilized bulk solution of a monomeric protein is described, which consists in providing a bulk of monomeric protein in a buffer solution and adding an excipient to the bulk, wherein the excipient is selected from the group consisting of bacteriostatic agents, surfactants, isotonicity agents, amino acids, antioxidants and combinations thereof. Preferably the monomeric protein is IFN-beta.
