(54) Title: GUEST-FACING GAME INFORMATION MANAGEMENT SYSTEMS AND METHODS

FIG. 4

(57) Abstract: A check-in system includes an amusement park attraction associated with a check-in process. The check-in system also includes a database and a controller. The database stores data indicating availability of the amusement park attraction. The controller receives a request from a guest to attend the amusement park attraction. In response to the request, the controller sends one or more forms, one or more waivers, or both, to the guest. The controller also receives the one or more forms, one or more waivers, or both, after completion. Moreover, the controller verifies the one or more forms, the one or more waivers, or both, to be in compliance for the amusement park attraction. Furthermore, in response to determining compliance, the controller sends an entrance code to the guest, which indicates a verified status.
