(54) Title: A VALVE

Fig. 4

(57) Abstract: A valve comprises a valve housing with a valve chamber having an internal chamber wall. A plurality of ports are opening into the valve chamber and a valve body (6) is movable to optionally seal one (5a) ports. An endless resilient sealing member (7) situated in a sealing member groove (8) is sealing between the valve body and the inner chamber wall. The sealing member groove has a cross-section defining a cavity (9) and an opening (10). The sealing member is situated in the cavity, the opening is more narrow than a cross-sectional dimension (Di) of the sealing member, and at least one channel (11) is provided connecting the cavity of the sealing member groove and surroundings of the valve body.
