(54) Title: VIDEO EDITING METHOD AND DEVICE

(54) 发明名称: 视频剪辑方法及装置

获取视频剪辑模板, 并基于视频剪辑模板展示片段标识; 其中, 视频剪辑模板用于指示在至少一个指定视频片段上施加指定剪辑操作, 片段标识与指定视频片段一一对应, 片段标识用于提示用户为片段标识对应的指定视频片段导入视频素材

S101 Obtain a video editing template, and display clip identifiers on the basis of the video editing template, wherein the video editing template is used for instructing to apply a specified editing operation on at least one specified video clip, the clip identifiers have one-to-one correspondence to the specified video clips, and the clip identifiers are used for prompting a user to import video materials into the specified video clips corresponding to the clip identifiers

响应于呈现剪辑结果的触发操作, 基于目标视频素材和指定剪辑操作, 呈现在目标视频素材上施加指定剪辑操作得到的剪辑结果; 其中, 目标视频素材与指定视频片段一一对应; 目标视频素材与指定视频片段一一对应; 若指定视频片段中包括第一视频片段, 第一视频片段对应的目标视频素材为预设视频素材, 第一视频片段为在响应到触发操作的情况下用户未导入视频素材的指定视频片段

S102 In response to a trigger operation of presenting an editing result, presenting, on the basis of target video materials and the specified editing operation, an editing result obtained by applying the specified editing operation on the target video materials, wherein the target video materials have one-to-one correspondence to the specified video clips; the target video materials are imported into the specified video clips corresponding to the target video materials to form the editing result; and if the specified video clips comprise a first video clip, a target video material corresponding to the first video clip is a preset video material, and the first video clip is the specified video clip into which a video material has not been imported by the user in response to the trigger operation

(57) Abstract: The present disclosure provides a video editing method and device. In the scenario of using a video editing template to perform video editing, clip identifiers having one-to-one correspondence to video clips indicated by the video editing template are displayed on the basis of the video editing template to prompt a user to import video materials into the specified video clips corresponding to the clip identifiers; in response to a trigger operation of presenting an editing result, an editing result obtained by applying, on target video materials, a specified editing operation indicated by the video editing template is presented, wherein the target video materials have one-to-one correspondence to the specified video clips, and the target video materials are imported into the corresponding specified video clips to form the editing result; and if the specified video clips comprise a first video clip into which a video material has not been imported by the user, a preset video material is added to the first video clip. According to the method, a user can conveniently and flexibly preview an editing result when video materials have not been fully imported into video clips indicated by a video editing template, and thus the video editing experience is improved.
